WIRING DIAGRAM

! WARNING Risk of Electrical Shock

Turn power off at main panel before servicing this switch or the equipment it controls. Use Copper wires only. Reinstall safety guard after wiring.

PROGRAMMING INSTRUCTIONS:

- 1. TO SET FIRST ZONE:** For watering, push gold pin into slot on yellow dial at desired ON time. For each 12 minutes of additional watering add one pin **WITHOUT** skipping a slot.
- 2. TO CHANGE ZONES:** Leave one blank slot on yellow dial after ON line (gold pin), and valve will automatically advance to next zone.
- 3. TO SET ADDITIONAL ZONES:** Repeat steps 1 and 2. **REMEMBER** to leave blank space between zones
- 4. TO SET TIME OF DAY:** Turn yellow dial **CLOCKWISE**, until correct line is at end of silver time pointer. Do **NOT** turn silver pointer.
- 5. TO SKIP DAYS:** Turn black skipper wheel **COUNTER-CLOCKWISE** until today's day is in front of "14" arrow. Press pins **DOWN** on days of **NO** watering. The skipper wheel must have all pins **UP** for daily watering. **NOTE:** The silver pin in dial advances this skipper wheel automatically. Do not use multiple silver pins.
- 6. PUT SELECTOR SWITCH IN AUTO:** This switch can be used to turn the system **ON** or **OFF** for manual operation without affecting the set program.
7. Move **WATERING OPTION SWITCH** to desired position.
 - **TIMER ONLY:** Pump turns **ON** when Timer is **ON**
 - **TIMER & RAIN SENSOR:** Pump turns **ON** when both Timer is **ON** and Rain Sensor is dry.

NOTE: Rain sensor (*sold separately*) must be the Normally Closed type.

Follow The National Electrical Code and local code requirements when installing this time switch.
