INTERMATIC WP SERIES INSERT INSTRUCTIONS

The enclosed insert is designed to be used with Intermatic WP Series plastic or die cast weatherproof receptacle covers. This insert, is designed to be mounted either vertically or horizontally depending on the application requirements. The 2 gang inserts WP100 and WP200 series are designed to be rotated 90 or 180 degrees provide the flexibility, for 2 gang mounting with two different devices, and allow the installer to select which side the selected devices should be on. For example; a toggle switch/GFCI combination can be mounted so that the toggle switch is on the left OR right side of the junction box. For mounting the receptacle cover, refer to the instruction sheet enclosed with the receptacle cover.

Listed below are the inserts currently available. Inserts with no hardware and/or gasket, use the hardware and/or gasket supplied with series 1000 models.
