LUT-5x10-ENC Enclosure with Knockouts

The LUT-5x10-ENC enclosure includes 6 available side knockouts as well as 1 top or 2 bottom knockouts. These provide access for installations where running wiring through piping is desired or required by local code.
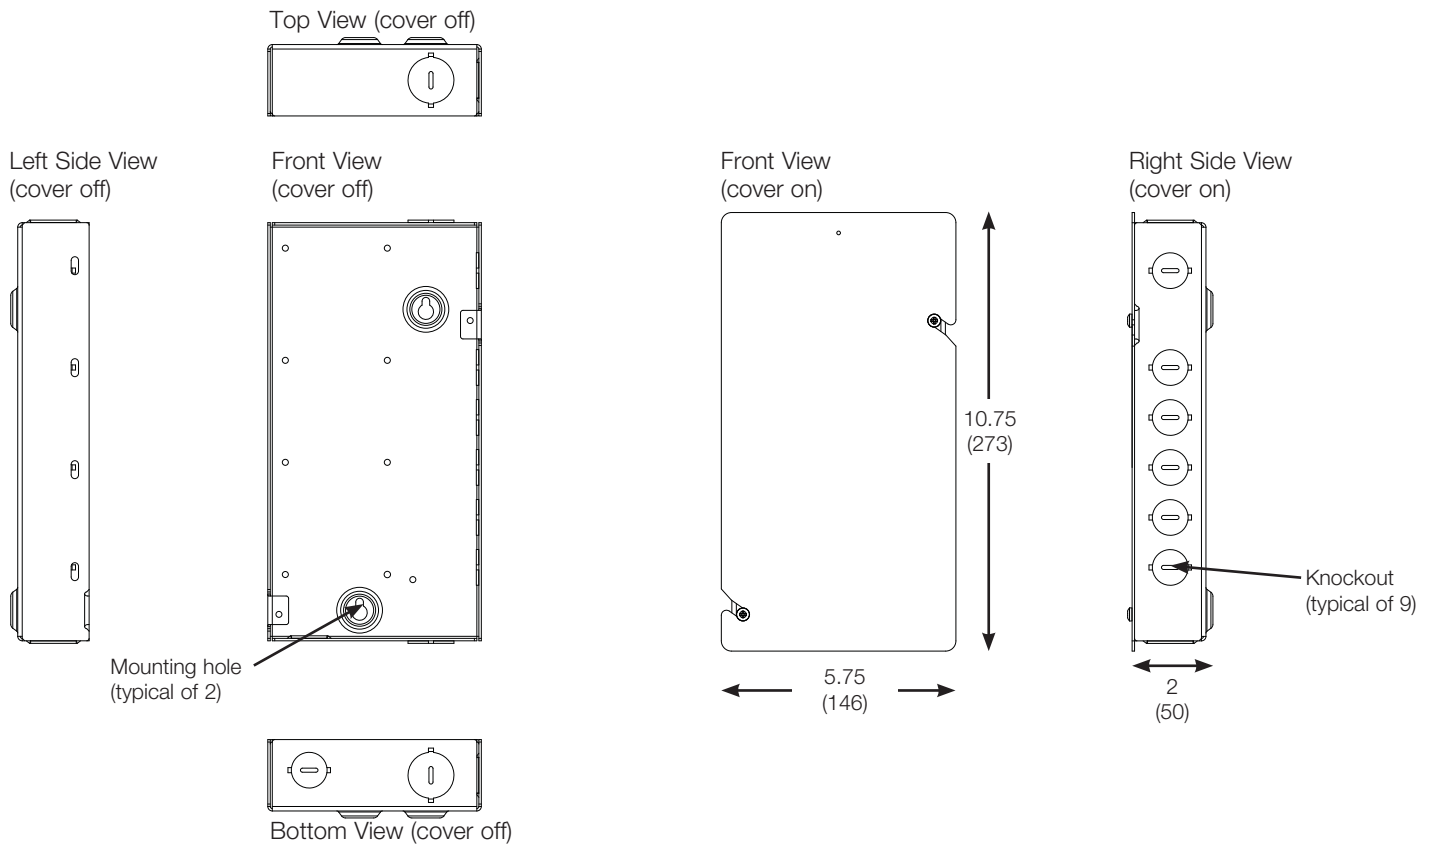

Features

- Provides mounting for one GRX-CI, OMX-CI, or similar Lutron control interface unit.
- Screws to attach cover included.
- Mounting screws provided by customer.
- Steel construction with black powder coat finish.
- Complies with requirements for use in other spaces used for environmental air (plenums) per NEC® 2014 300.22(C)(3)
- Meets the Canadian National Building Code plenum requirements for a concealed space used as a plenum within a floor or roof assembly
