

Wire Cage Guards

Wire cage guards are heavy-duty, coated, 9-gauge wire guards that can be used to minimize or reduce sensor damage. Wire cage guards can be installed in gymnasiums, warehouses, locker rooms, and multi-purpose rooms to protect sensors from damage or destructive strikes. Mounting clips are included.

Features

- Protect in-wall or surface-mount sensors
- Heavy-duty, coated, 9-gauge metal wire
- Common applications include:
 - Gymnasiums
 - Warehouses
 - Locker rooms
 - Multi-purpose rooms
- Mounting clips included
- Multiple models available depending on type of sensor to be protected
- Available in white only

Model Numbers

Model	Works with	Dimensions
L-WIRECAGE-WBX	All in-wall sensors	6.25 × 4.0 × 2.25 in (159 × 102 × 57 mm)
L-WIRECAGE-W	LOS-WDT, LOS-WIR, all in-wall sensors	7.0 × 5.75 × 4.5 in (178 × 146 × 114 mm)
L-WIRECAGE-C	LOS-CDT, LOS-CIR, LOS-CUS	7.0 × 7.0 × 3.25 in (178 × 178 × 83 mm)

Specifications

Environment

- Ambient operating temperature: 32 °F to 104 °F (0 °C to 40 °C), 0%–90% humidity, non-condensing. Indoor use only.

Warranty

- 5-Year Limited Warranty. For additional Warranty information, please visit www.lutron.com/TechnicalDocumentLibrary/Sensor_Warranty.pdf

Sensor Performance

- Coverage patterns and range will be limited by the addition of these cages (see diagrams in the *Sensor Coverage* section for guidance). Exact coverage will vary, depending on how the sensor and cage are mounted. To test coverage of sensors, use Test Mode.
- Not recommended for use with RF sensors. The metal wire cage forms an RF barrier around the sensor that significantly reduces the RF performance. For installations where an RF sensor is required, the RF range can be tested with the cage installed after associating the sensor to a load control device.

Mounting

- Center the wire guard over existing sensor.
- Drill four 0.25 in (6.3 mm) mounting holes. Hardware provided.
- If lag bolts are used, make sure anchor is flush with surface. Position guard, insert lag bolt and tighten. Lag bolt should be long enough to assure full thread engagement in anchor.
