Get Started with Your RadioRA 2 PRO Package Today!

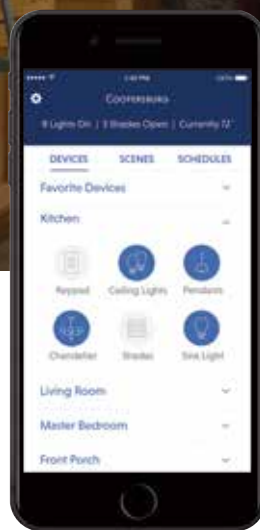

## Control Lighting with Ease

A homeowner can conveniently control and monitor his home's lights, shades, and temperature as he approaches his home, from anywhere inside his home, or even while away using the Connect app.

seeTouch C•L Hybrid Keypad 4-scene with raise/lower

Connect App

Connect Bridge

## Flexible PRO Solutions

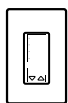

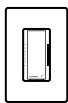

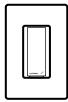

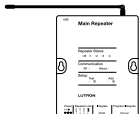

The hybrid keypad acts as both a dimmer and a keypad, allowing a homeowner to set lighting levels in a room or rooms depending on the selected scene.

The LED+ in-wall dimmers leverage the latest in LED dimming technology to provide the best dimming performance for additional loads in the space.

Expand the system in the future by installing wire-free Triathlon shading solutions and customized seeTouch keypads.

# What's included in the PRO Package?\*

## RR-FDN-PRO-WH

Product	Model Number	Description	Quantity
<b>RadioRA 2</b>			
	RRD-HN4S-WH seeTouch C-L Hybrid Keypad	RadioRA 2 C-L hybrid keypads function as a dimmer and keypad in one device. Keypads have 4 scenes with raise/lower and a neutral wire dimmer. 450W/450VA (Inc/Hal/MLV) or 100 W (approved LED/CFL) 120V	1
	RRD-PRO-WH PRO LED+ neutral optional dimmer	RadioRA 2 Maestro PRO LED+ dimmers are phase selectable for dimming 250W LED, 500W Inc/Hal/ELV, 400VA/MLV. Maestro PRO LED+ dimmers can be wired with or without a neutral connection and use conventional 3- and 4-way wiring for additional control from RadioRA 2 Maestro remote dimmers.	3
	RD-RD-WH remote dimmer	RadioRA 2 Maestro remote dimmers use standard 3- and 4-way wiring for additional control of RadioRA 2 Maestro dimmers from up to 9 locations.	1
	CONNECT-BDG2-1 Lutron Connect Bridge	The Lutron Connect Bridge allows for convenient and intuitive control of RadioRA 2 via the Lutron Connect app and also allows integration with connected home technologies such as voice control and audio systems. The Lutron Connect app can control lights, shades, temperature, audio, and keypads from a mobile or wearable device from anywhere in the world.	1
	RR-MAIN-REP-WH RadioRA 2 main repeater	RadioRA 2 repeaters extend the range of RF signals that are sent between devices. Repeaters ensure error-free communication between system components and prevent interference from neighboring systems.	1

\* Faceplates not included
