RadioRA 2

## Get Your RadioRA 2 Starter Package Today!

Control Lighting With Ease

A homeowner can conveniently control and monitor his home's lights, shades, and temperature as he approaches his home, from anywhere inside his home, or even while away.

Connect Bridge

Connect App

Pico Wireless Remote, 4-Button

Be Home, Without Being Home

A homeowner can always come home to a warm welcome: geofencing from the Connect app can turn on foyer lighting, or he can use the Pico remote to turn on a "Welcome" scene from his car.

He can also use the Pico to trigger an "Away" scene, which adjusts foyer lights to a dim level to make the home appear occupied.

Expand the system in the future by installing wire-free Triathlon shades and customized seeTouch keypads.

☀ LUTRON

Product	Model Number	Description	Quantity
RadioRA 2			
	PJ2-4B-GWH-L31 Pico wireless remote; 4-Button	The Pico wireless remote is flexible, easy to use, and allows the user to control Lutron wireless load-control devices from anywhere in the space. This battery-operated control requires no external power or communication wiring.	1
	RRD-6ND-WH Neutral-based dimmer	RadioRA 2 Maestro LED with neutral dimmer controls 150W LED, 600W Inc. Maestro LED dimmers with neutral dimmers are wired with a neutral connection and use conventional 3- and 4-way wiring for additional control from RadioRA 2 Maestro remote dimmers.	3
	CONNECT-BDG2-1 Lutron Connect Bridge	The Lutron Connect Bridge allows for convenient and intuitive control of RadioRA 2 via the Lutron Connect app and also allows integration with connected home technologies such as voice control and audio systems. The Lutron Connect app can control lights, shades, temperature, audio, and keypads from a mobile or wearable device from anywhere in the world.	1
	RR-MAIN-REP-WH RadioRA 2 main repeater	RadioRA 2 repeaters extend the range of RF signals that are sent between devices. Repeaters ensure error-free communication between system components and prevent interference from neighboring systems.	1
