

Specification Data SmartExhaust™ - Fan/Light Wall Control with Delay Timer

Description:

Ventilation Fan Control FV-WCPR1-W Fan/Light Control with Delay Timer makes standard bath fans ASHRAE 62.2 compliant, Wall plate not included.

SmartExhaust™ Features and Benefits:

- Earn LEED and Energy Star points for enhanced exhaust ventilation
- Replaces both fan and light switches for 1 easy operation
- Microprocessor technology provides precise ventilation times
- Programmable DELAY and VENTILATION settings
- Excess manual and/or delay operation is subtracted from the next hours' programmed ventilation time
- Works with ALL incandescent, CFL, fluorescent and LED lights
- Make standard bath fans ASHRAE 62.2 complaint when used with ASHRAE 62.2 complaint fans

**Rocker style not compatible with all LED bulbs. Dimmable LED bulb recommended*

SmartExhaust™ Settings:

VENTILATION setting allows the user to set the number of minutes per hour the fan should run.

DELAY setting allows the user to set the number of minutes the fan should run after the bathroom light has been turned off. This setting provides additional run time for the fan to complete the remaining necessary ventilation after use. SmartExhaust™ replaces an existing switch, there are no additional labor costs required for installation. Simple and economical fan and light operation is provided by one switch.

Warranty:

ALL Parts: For period of 2 years (24 months) from the date of the original purchase.
