# Other

**Bi-Level:** Allows 25%, 50% or 75% output modes

#### **Ultrasonic Sensor:**

Detects the presence of people by sending ultrasonic sound waves and measuring frequency changes caused by movement. They cover the entire space and don't need a line of sight. As a result, they can detect people behind obstacles and are ideal for stairwells in which a line sight is not always possible, and higher levels of sensitivity are required.
